

TAKE HAIR REMOVAL TO THE NEXT LEVEL.

Kiss the hassle of shaving, painful waxing and tweezing goodbye! Using gentle, yet effective BBL™ energy to heat hair follicles, the **revolutionary Forever Bare BBL** treatment is as comfortable as a hot stone massage. The result is hair removal that's **more comfortable, safer, and typically faster** than other traditional treatments. Treat any area of the body with unwanted hair to reveal beautiful skin.

DARE TO BARE SOFT, SILKY, SUPPLE SKIN!

FREQUENTLY ASKED QUESTIONS

HOW MANY TREATMENTS WILL I NEED?

Most areas require 3-5 treatments applied at 4-6 week intervals to achieve optimal benefit. Long-term results depend on multiple factors such as hair thickness, the area treated and the hair's growth cycle.

WHAT HAPPENS DURING THE PROCEDURE?

Treatments are comfortable and safe. A clear gel will be applied to the skin. Then, the BBL energy is delivered with a cooled applicator so there is minimal or no discomfort. Your treatment provider may choose to glide the applicator on the skin or stamp it depending on size and location of treated area. During the treatment, some patients experience a warm or stinging sensation in the treatment area. For your safety, your eyes will be protected with safety shields or glasses. Personal sensitivity varies from patient to patient. Discuss your sensitivity with your clinician before treatment.

HOW LONG DOES A FOREVER BARE BBL TREATMENT TAKE?

Treatment time will vary depending upon the size of the area treated and your hair and skin type. Typically, a smaller area only takes a few minutes while a large area can take 15 minutes or longer. Forever Bare BBL is a comfortable treatment with virtually no downtime. In most cases, you can resume your normal daily activities immediately.

WHAT HAPPENS AFTER THE TREATMENT?

Immediately following your treatment, you may experience some redness that should go away within a few hours. A few days to a week after treatment you may experience what seems to be regrowth of hair. Most of these hairs are actually being shed as a result of your Forever Bare BBL treatment and are not growing back. Minimal aftercare is needed. Your clinician will provide you with more information on what to expect as well as give you an aftercare plan to follow that will involve avoiding direct sun exposure and using sunscreen.

REVEAL BEAUTIFUL SKIN

EXCEPTIONAL RESULTS WITH A FEW COMFORTABLE & TYPICALLY FAST TREATMENTS

Forever Bare BBL is a comfortable treatment with virtually no downtime. During the treatment, pulsed light delivers photothermal energy to hair follicles. The rapid, short pulses of light or photothermal energy causes the hair follicle to stop producing hair without harming any surrounding tissue.

Hair grows in three stages: anagen, catagen and telogen. Forever Bare BBL predominantly treats hairs in the anagen phase, also known as the active growth phase. Since not all hairs are in the same growth stage at the same time, multiple treatments are necessary to target all hair in the treatment site.

Any area of your body can be treated. The most common areas are the face, under arms, arms, legs, bikini area, chest, shoulders and back.
